Since 2018, Tharayil Power has been dedicated to helping our customers embrace energy conservation with products that make a difference. From Solar Power Plants to BLDC fans, we carefully select solutions that blend quality with sustainability. Our greatest reward is the satisfaction of our customers, which we achieve by staying connected, ensuring quality at every step, and offering ongoing support. We're constantly innovating and working closely with experts to bring affordable, impactful energy solutions to everyday people and small businesses. At Tharayil Power, we believe in earning trust through reliable products and genuine care for our customers' needs.

Vision

To lead the transition towards a world powered by renewable energy, creating a greener and healthier planet for all.

Mission

To empower individuals, businesses, and communities with innovative solar solutions for a sustainable future.

Core Values

- **Integrity:** We believe in absolute and adamant integrity, which is basic for trust, communication, and living up to commitment.
- **Professionalism:** We are determined to maintain the highest standard of professionalism. We are committed to delivering excellent results, thereby keeping a long-lasting business relationship with our clients and partners.
- **Commitment & Trustworthiness:** We believe in maintaining a positive attitude and commitment towards carrying out the role and responsibility. We bear in mind to uphold honesty and truthfulness in all our business transactions and associations as the key objective.
- **Teamwork & Respect:** We support each other as a team to achieve common goals and keep our organisation a leading EPC company in India and abroad. We also believe in having the utmost respect for each other for prosperity. Our teamwork and mutual discussions help us resolve the differences professionally.
- **Performance Orientation:** Our performance at all levels is key to the success of our organization. We recognize the best performers who go out of their way to achieve the targets within the defined parameters. We recognize and encourage innovative ways of doing our activities and are open to new suggestions, and ideas in the interest of the organization.

Why Choose Us

In today's world of high energy demands, we recognize our responsibility as a renewable energy company to make a positive impact. Our approach goes beyond profit—we focus on delivering solutions that benefit both our customers and the environment. We are driven by a passion for sustainable energy, and we believe that our commitment to these values sets us apart in a competitive market. This dedication is what earns and maintains the trust of our customers.

SOLAR ACUMEN OF THE YEAR

CEO's Message

Tharayil Power is a renewable energy company that started in 2018 with the goal of saving energy and revitalizing electricity. In this age of high energy consumption, we are trying to reach out to consumers with an emphasis on energy conservation. We are optimistic that through various products we will be able to quickly reach our ultimate goal of Energy Conservation and Green Energy promotion. Renewable energy is very relevant in this changing electric vehicle era. We consider it a great achievement to have gained a handful of Satisfied Customers in this short period. We often attract customers who are reluctant to adopt solar products by explaining their benefits. We pay special attention to providing the best Sales Services to our Customers at regular intervals after each job. Above all, we value customer satisfaction as a key factor. In addition to Energy Conservation, we need to ensure a Sustainable Energy supply for the future."

CUSTOMERS

HAPPY CUSTOMERS

Our Products

Solar Grid Tied Power Plant

- We endorse reputed PV module manufacturers' products only.
- IEC-certified components with MNRE specifications.
- Solar PV modules with 30 years of performance warranty.
- 12-year product warranty for solar PV modules.
- Eliminating electricity bill.
- High-quality standard Distribution Boards, LAs, Earthing, etc.
- Maximum efficiency will be obtained by using premium quality Grid Tied Solar Inverters with a 8 to 10-year warranty.

Our Products

Solar Off Grid Inverter System

- We endorse reputed PV module manufacturers' products only
- Solar PV modules with 25 years of performance warranty
- 10 years product warranty for solar PV modules
- Eliminating electricity bill completely
- High-quality standard Distribution Boards, LAs, Earthing, etc.
- Maximum efficiency will be obtained by using premium-quality
- Grid Tied Solar Inverters with warranty for 5 years
- Suitable for homes, offices, commercial applications and Houseboats
- IEC certified Solar PV modules from reputed manufacturers
- Pure sine wave IGBT technology Power Conditioning Units (PCU)
- MPPT Solar Charger Controller for optimum efficiency
- High-quality C10 ratio Solar Tubular Batteries provide long-life
- 2-year warranty for PCU (Inverter)

Our Products

Solar water heater (100 LPD to 1000 LPD)

- Evacuated Tube Collector technology
- Superior SS316 grade inner tank
- SS316 is highly corrosion-resistant for borewell and Chlorinated water
- Stainless steel 304-grade outer tank (Powder coated and GI also available)
- PUFF having a density of 100 kg/m³ will sustain water temperature for up to 72 hours
- Optional additional heater facility available
- Galvanized Iron powder-coated support stand
- Efficient performance in winter as well as cloudy weather
- Marginal savings in electricity and fuel costs
- 10 tubes for 100 LPD water heater
- 5 years replacement warranty

Our Products

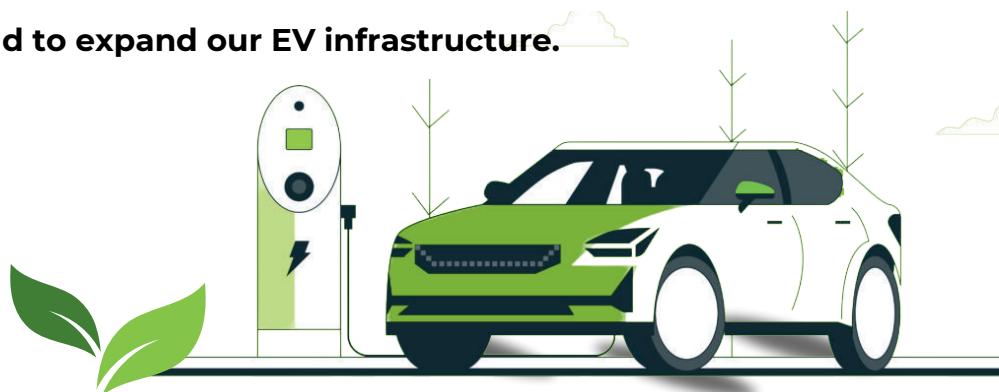

E-Mobility

As household budgets are strained by rising fossil fuel prices, the shift to electric vehicles becomes inevitable. According to the Government of Kerala's policy, about 10 lakh electric vehicles are expected on the roads by 2025. This surge necessitates the establishment of sufficient charging stations.

Advantages of our EV Chargers over a standard 13A plug:

- Fast Charging: Depending on their rated capacity, EV Chargers can charge your EV much faster (multiple times) compared to a 13A plug point.
- Safety: Equipped with in-built protection systems to enhance overall safety.
- Access Control: Features OTP/RFID authorization systems, ensuring that your charging point cannot be misused without permission.
- Smart Features: Most EV Chargers offer remote access, control, and other smart functionalities.

We are also collaborating with well-known companies in this field to expand our EV infrastructure.

Our Products

Home Automation System

- This segment of automation systems is particularly relevant in the domestic sector. IoT-based applications are increasingly popular and useful.
- Convenience is the key factor most customers seek during the construction of their dream home.
- Home Automation Systems can meet each customer's needs with a variety of customized options such as:
- Remote Controlling of Gates, Centralized Lighting Control, Air Conditioning Remote Control, etc.

Brushless DC (BLDC) fans

Brushless DC (BLDC) fans are next-generation ceiling fans designed to reduce electricity consumption compared to ordinary ceiling and colors. The introduction of regulators on walls. These fans also an attractive feature for customers.

fans. These fans are available in a variety of designs remote controllers has replaced conventional come with a 5-year replacement warranty, which is
